[NEWS] - Improved interface! [FIXED] - Fixed the compatibility with the new Windows 8.1! [FIXED] - Fixed a possible bug! Keymacro v5.2.20 [FIXED] - Fixed a bug! [FIXED] - Fixed some crashes! Keymacro v5.2.18 [NEWS] - Added a new interface! [FIXED] - Fixed a bug! [FIXED] - Fixed some crashes! [FIXED] - Changed the error handling! [FIXED] - Fixed a bug! [FIXED] - Fixed the compatibility with the new Windows 8.1! Keymacro v5.2.17 [NEWS] - Added a new interface! [FIXED] - Fixed a bug! Keymacro v5.2.15 [NEWS] - Added a new interface! [FIXED] - Fixed a bug! [FIXED] - Fixed the compatibility with the new Windows 8.1! Keymacro v5.2.13 [FIXED] - Fixed a bug! Keymacro v5.2.12 [NEWS] - Added a new interface! [FIXED] - Fixed a bug! Keymacro v5.2.11 [NEWS] - Added a new interface! [FIXED] - Fixed 2edc1e01e8

The most comprehensive Windows tool available. With over 30,000 components and one of the largest databases in the world, CPU-Z does everything and anything you want it to. With over 30,000 components and one of the largest databases in the world, CPU-Z does everything and anything you want it to. Simple & comprehensive CPU-Z does one thing well: It does everything. It gathers information about everything you want to know. Simple data for simple computers, detailed info for complicated systems. It works on every type of system, from simple netbooks to hardcore multi-processor servers. The simplest CPU-Z experience CPU-Z is as simple as possible: There's one window, and that's it. All the data you need is visible at once. It's like having a computer guru on-call, with immediate answers, and ready to guide you to the info you need. The world's largest database CPU-Z is not just the most comprehensive PC tool in the world, it's the largest. It has over 30,000 components, which means it's always up-to-date. That's because we update our database constantly, day in, day out. That's because we update our database constantly, day in, day out. Hundreds of thousands of individual measurement points CPU-Z knows every detail about every part of your computer. We know the model of every CPU, motherboard, and chip in your PC. We know exactly what you have. And that means we can tell you exactly what your computer is capable of, at any point in time. Easy to use, with a clean UI CPU-Z is simple to use, and our interface is nothing short of elegant. Everything is on the screen, and everything is at once. Check your RAM, CPU, and battery. Switch over to information about your hard drive, sound card, or graphics card. Network connections are supported, and can be displayed as they're used. Tabs let you dig deeper into any part of your system, if you know where to look. See your system in your own words Want to know exactly what your computer does? All the details are visible. So you can see exactly what your PC does, from wireless LAN cards to hard drives, and even your integrated and PCI-E cards. Break your system down into more details CPU-Z knows every detail about every component in your PC. It's amazing how much you can find out. You can
